Lill

Still in pain. Medications not helping that much. Trying to not stay in bed too long, may cause pneumonia.

Talked to my primary dr and neurologist. And they will try to get me into a pain center. The neur. mentioned a procedure called Radio Frequency Ablation-- high radio freq. waves kill the nerve endings. However it must be a fairly new thing because two places I called did not do it.

Will wait until Tues to call my dr and see whats going on.

Jack said he mailed the fam. hist. out Wed. also one to Hy who will copy them an send them to all the cousins.

Jack did some job compiling them and you will see cousins you never heard of. The oldest gose back to 1810. Got to get back to the Yankee-Red Sox game.

Bye for now---Love, Irv
